WORK-EXPERIENCE

EDUNET FOUNDATION | FULL STACK INTERN   Remote | 10th Feb – 21st Mar
Developed a Service for Delivering Food with MERN Technology "The Food Delivery Application platform project is designed to create a platform where users can browse, select, purchase, and manage products with secure user login. The platform ensures that any actions taken by the user, such as adding food items, restaurant listing, are instantly updated and reflected in the user's account.

CERTIFICATIONS AND COURSES

- **WEB DEVELOPMENT TRAINING** (UDEMY)   Sep 2023
- **REACT TRAINING** (INTERNSHALA)   May 2024
- **ZS CAMPUS BEATS** (UNSTOP)   Aug 2024
- **NAUKRI CAMPUS YOUNG TURKS** (NAUKRI)   Oct 2024

PROJECTS

- **YelpCamp :-** YelpCamp is a web application where users can create, rate, and review campgrounds. Users must have an account to review or add campgrounds. The app is built using Node.js, Express, MongoDB, and Bootstrap, with Passport.js handling authentication. Login is a high-priority feature, requiring a user ID and password for access. The app includes API secrets and passwords that are hidden.
- **DreamPlanner :-** DreamPlanner is a tourism booking platform that allows users to explore, view deals and book trips worldwide. It features user authentication for secure access, enabling users to book tickets and tourism packages by contacting the owner. The platform ensures seamless travel planning experience.
